

Outside-domain proximity within disordered sequence

Outside-domain distance from nearest edge

Domain-distal >40 aa

$q=2 \times 10^{-9}$

Domain edge 21-40 aa

$q=6 \times 10^{-4}$

Domain edge 11-20 aa

$q=8 \times 10^{-4}$

Domain edge 6-10 aa

$q=0.4$

Domain edge ≤ 5 aa

$q=4 \times 10^{-3}$

log2(OR) vs disordered non-methyl arginines outside domains

Restricted to methylarginine sites and background arginines that are already inside annotated IDRs.
