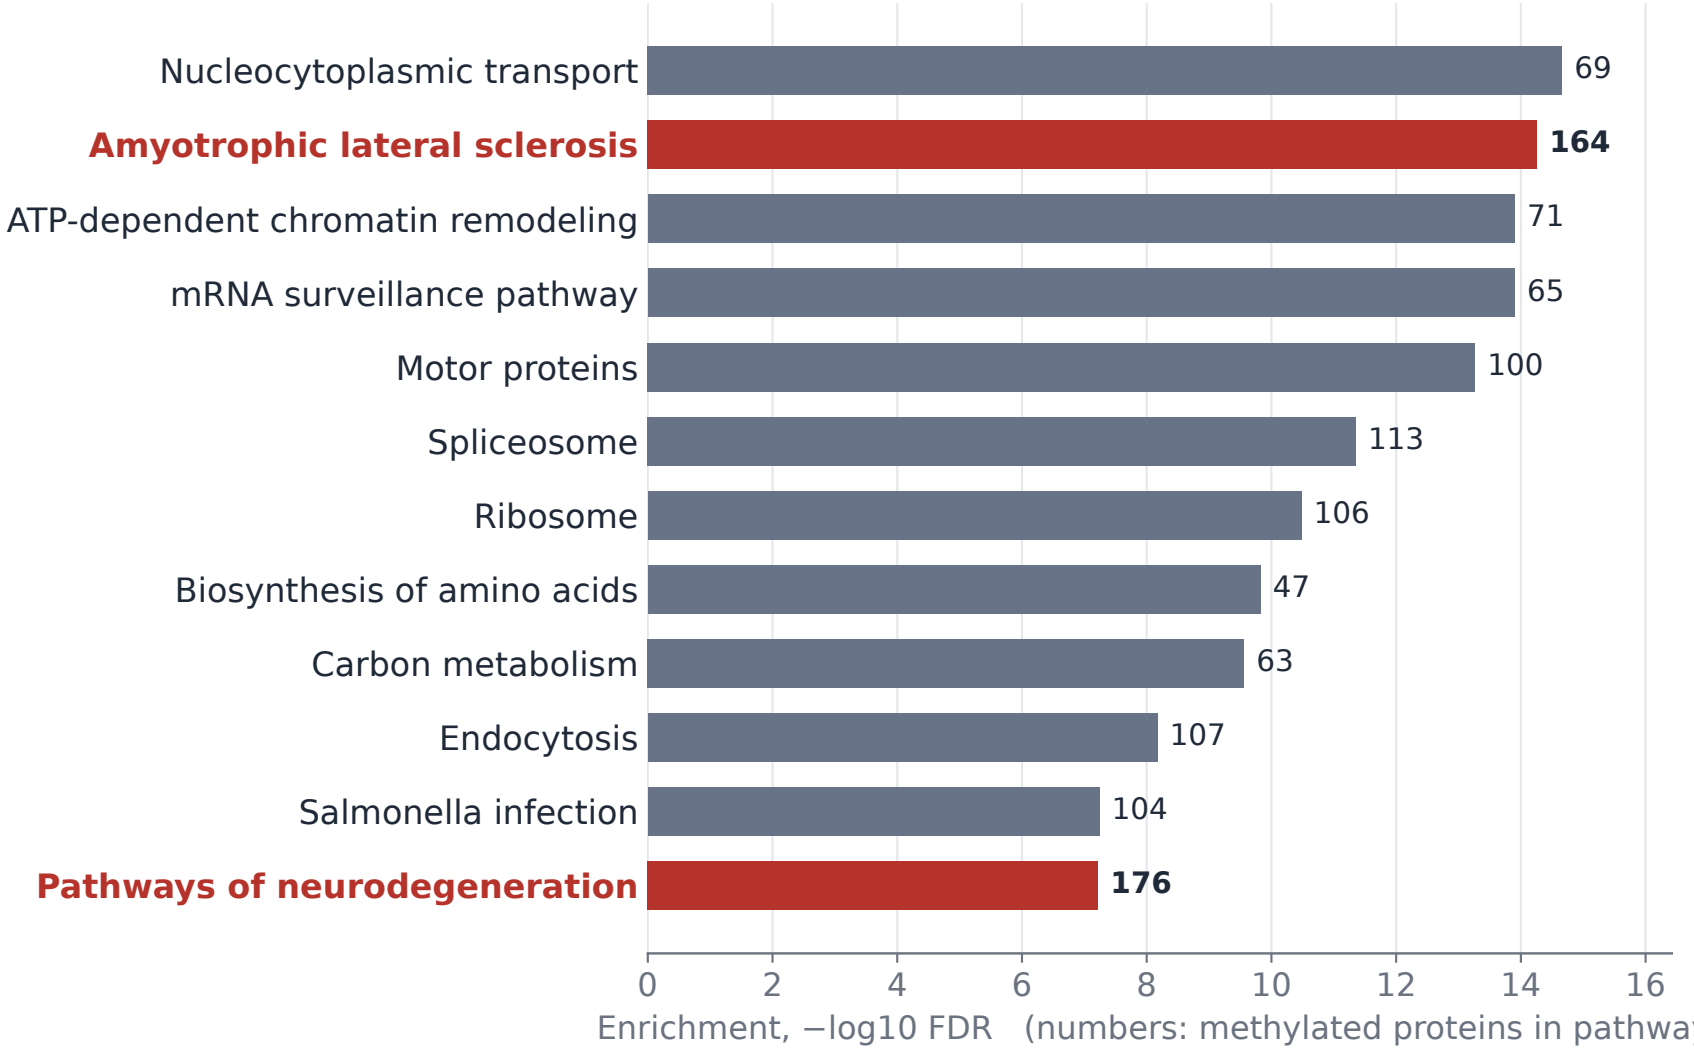
ALS is the #2 KEGG pathway for arginine-methylated proteins

KEGG enrichment of 2,340 KEGG-annotated methylated proteins. Top 12 of 68 significant pathways.



Methylated proteins in the KEGG ALS pathway

TARDBP FUS HNRNPA1 HNRNPA2B1 MATR3 ATXN2 VCP SOD1 UBQLN2 SQSTM1 NEFH PRPH DCTN1 SETX TUBA4A

+ 149 more

164 of 369 pathway proteins are methylated (1.8-fold over expected; FDR 6e-15).

clusterProfiler enrichKEGG (organism hsa, default KEGG background, BH), as in the 2022 analysis of Maron et al. 2021 Table S5, re-run on the PTM_pipeline methylarginine union (Table S5, PRoMetheusDB, curated PTM databases). Against a stricter MS-detectable background the ALS pathway ranks 11 (FDR 0.001).
